FOREWORD & KVP ACTIVITIES

FOREWORD BY PERODUA AUTO CORPORATION SDN BHD, PRESIDENT AND KVP ADVISOR

Thank you and congratulations for another record year despite the overwhelming challenges faced in 2016 which include a tough market, rising costs and intense competition from other players.

However, despite these challenges, we were able to further improve almost all aspect of our operations from a quality and productivity standpoint while further improving our cost competitiveness.

There is hope that the local automotive market is recovering and now is the time for us to consider expansion to maximise the good times which are coming.

Many of you have shown your commitment and dedication towards going global and now it is nearly time for us to go global.

Perodua will continue to assist our vendor particularly in mitigating the impact of higher foreign exchange cost such as by improving our payment timeframe to ensure available cash flow.

We are also happy to note that some of you have taken the initiative to work with the government such as with the Malaysia Automotive Institute to further expand your business.

We hope that this Annual General Meeting would discuss and further chart our future together – not only in Malaysia but also beyond.

Best regards

Masanori Takahashi
President
Perodua Auto Corporation Sdn Bhd

Y.Bhg Datuk Ahmad Suhaimi Hashim
President
Perodua Global Manufacturing Sdn Bhd

FOREWARD BY THE PRESIDENT OF KELAB VENDOR PERODUA, MALAYSIA

The slowing down of the Malaysian economy have had negative impact on the Total Industry Volume (TIV), with the new vehicles registration in 2016 dropped by about 13.0% to 580,000 units from the record high achieved in 2015. In contrast however, the sales of luxury cars increased by almost 4.0%. These data show the unfavorable economy, ringgit depreciation and its volatility, stringent loan approval and the disproportionate wage adjustment to inflation led to the decline in consumer demand among low to medium income groups.

Despite these unfavorable national economic conditions, it is remarkable that the sale of Perodua cars was least affected with increased market share of almost 40.0% of the total 512,000 of Light Motor Vehicles (LMV) sold in 2016.

KVP is optimistic that with the anticipated mild economic recovery and TIV growth of 2.0% in 2017, it will bring positivity to the market and sales of Perodua car will be significantly higher. The coming launch of the complete model change of Perodua iconic model, the MYVI in the 4th quarter of 2017 coupled with the new market expansion through export drives will further boost Perodua sales growth.

The KVP would also like to welcome Masanori Takahashi San, the new President of Perodua Auto Corporation Sdn Bhd (PCSB). Mr. Takahashi has been one of the major supporters of the Perodua eco-system who is committed to the positive symbiotic relationship between the Perodua and the members of KVP.

The KVP members are indebted and always thankful to the Board of Director, Management and Staff of Perodua for their understanding and undivided support to the overall development and improvement to increase the sale revenue of its members. This is particularly so in facing the challenging times over the last three years and perhaps, in years to come, while the industry is undergoing various structuring reforms.

The anticipated increase in sales of Perodua cars will certainly help to reduce the adverse contagion impact of spiraling drop in sales of the other OEMS.

While we take pride of the growth, sustainability and close working relationship within Perodua eco-system, we must also be reminded of the present and future challenges of a large percentage of our KVP members who are negatively affected by the declining sales and market shares of the national brands and the rising number of pseudo-CKD assemblers. The trend is alarming as it could derail the investment and sacrifices made by the Government and Malaysians in developing the automotive manufacturing industry.

Under these uncertainties in our business operational environment, the KVP is committed to continue working closely with the Perodua Management, Government Ministries and their Agencies, Financial Institutions and other related agencies to ensure the damages are contained and reversible. Thus, while limited in scopes, KVP shall continue to lead in finding the holistic solutions.

KVP has been in the forefront in proposing to strengthen our members' technical capabilities, business networks and financial strength that would compensate the significant loss of sales due to contraction of demand of the national brands. The most notable activities are summarized as follows:-

- Work with Perodua and Government agencies to identify foreign companies that could add value to local companies through formal business collaboration and technical agreement or most fittingly with Joint Venture or Merger & Acquisition.
- Continuous improvement towards achieving Global Competitiveness. Internal regular courses are being organized between Perodua and KVP. Besides classroom learning, both Perodua have planned to organize group education tours of progressive and dynamic vendors' and manufacturing companies for members to learn and adopt some the more efficient shop floor management, in house continuous training and retraining programs, risk and safety management and others.

- Regular meeting with the relevant Government Ministries and agencies, especially MITI and Malaysian Automotive Institute (MAI) to request the status report on the progress outcome of NAP3, to review it when deemed necessary and represent as a member of the Government, National Automotive Council chaired by YBM of MITI. KVP have put a strong recommendation on the setting up of Auto-Parts Export Fund (APEF) to help finance the project for export of automotive parts and components and to recognize the 50:50 Joint Venture Company with foreign company with Local Manufacturing Warehouse (LMW) status be recognize as a local company and thus entitles for the special privileges accorded to local/Bumiputra company.
- To impose excise duty on sale of pick-up trucks that are used as passengers cars. These class of vehicles are mainly imported in CBU forms and its contribution to the economy is minimal compared to CKD and localization of parts and components purchases.
- Matters related physical VTA, VOEL and others continued to be raised as they road blocks to rapid rise in the development and sustainability of the automotive manufacturing industry which is critical impetus to “technicalization” of Malaysian economy.

Lastly, it is indeed pleasing to put on record our appreciation to the Perodua Management and its Board of Directors for extending their help in time of our needs and difficulties. Likewise, the Malaysian Government specifically MITI and its agencies have been very supportive of the vendors’ development program with Automotive and Automation Development Fund, Technology and Quality specification Grants and many others. In fact, the government plays significant roles in helping to strategically steer the Perodua eco-system to its current number one position.

Further, it is fair to say that it is not an uncommon practice for the Government to extend a helping hand or support in order to create a solid foundation on which the automotive sector can be strengthened. We have witnessed a courageous structural shift in the US, with government, companies, trade unions and financial institutions working side-by-side to do more than merely save the auto industry. We also saw the significant intervention by the French Government, where PSA Peugeot Citroen and Renault were the recipients of a government package totaling nearly Euro 8.5 billion to save the two companies from going under.

Likewise, in Malaysia, we have also witnessed the recent extraordinary effort of our government doing its part to revitalize the auto industry. In the interest of the industry the Government may have to respond with more urgency to any negative symptom in order to prevent the collapse of the National Automotive Manufacturing Industry.

The challenges ahead of KVP members are countless and with the continued support from all relevant parties we shall overcome the current headwinds and thrive to serve our stakeholders.

Thank you

Datuk Dr Wan Mohamed WE
President,
Kelab Vendor Perodua Malaysia

KVP WORKING OVERSEAS VISIT TO INDIA
